Professional Profile

Innovative IT Leader | Open Source | Cloud Computing | AI | Virtualization | HPC | Blockchain

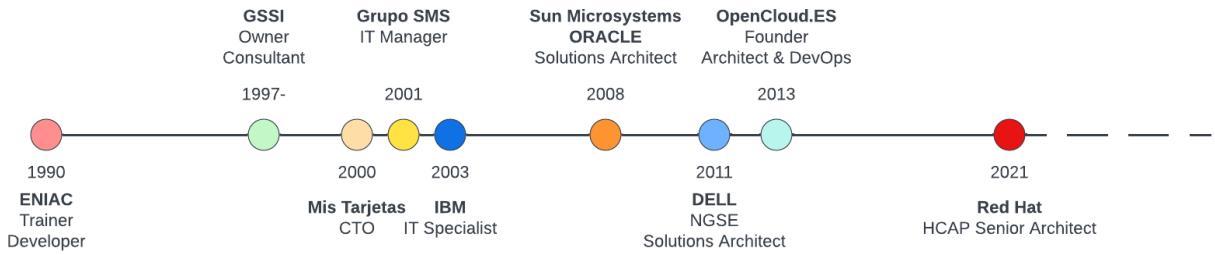
Senior technology leader with over 20 years of experience bridging the gap between infrastructure architecture and software engineering. Proven track record of designing, scaling, and managing mission-critical OpenStack and Kubernetes platforms for global Fortune 500 enterprises. Specializes in building and mentoring high-performing engineering teams, driving FinOps efficiency, and establishing modern operating models. Passionate about pioneering the use of Agentic AI, LLMs, and Model Context Protocol (MCP) to automate complex Day-2 operations and incident response at scale.

Core Competencies:

- Engineering Leadership: Team Building & Mentoring (up to 100 FTE), Agile/GitOps Delivery, Vendor Management, FinOps.
- Cloud Architecture: Hybrid/Multicloud Strategy, Kubernetes (OpenShift, EKS, GKE, AKS), OpenStack, Microservices Transformation.
- AIOps & Automation: Agentic AI, LLM Integrations (Claude, Openclaw), Runbooks-as-Code, CI/CD, Infrastructure as Code (Terraform, Ansible).
- Enterprise Scale: High-Availability (HA/DR), Petabyte-scale Storage (Ceph), Sovereign Cloud, Security & Compliance.

Currently open to leadership roles, where I can contribute to cutting-edge IT initiatives in cloud computing, AI, and blockchain.

Profesional track



Roles and Targets

2021- Red Hat - EMEA Principal Specialist Sol. Arch. Hybrid Cloud Adoption Team

Serves as the lead technical authority and engagement director for hyperscale cloud adoption, guiding enterprise clients through complex architectural transformations and Day-2 operational excellence.

- **Architectural Strategy:** Spearheaded the design and deployment of sovereign and hybrid cloud platforms (AWS, Azure, GCP, VMware) utilizing OpenShift (OCP) and OpenStack (RHOSO). Defined reference architectures adopted by major telecommunications, banking, and public sector clients.
- **Massive Scale Delivery (Core42):** Led the architecture for a UAE Public/Private Sovereign Cloud, deploying 27 OCP clusters, 9 OSP clusters, +2,000 compute nodes, and 10PB of Ceph storage with integrated NVIDIA GPU support for AI workloads.
- **Technical Leadership & Mentorship:** Directed matrixed teams of engineers, SREs, and developers across multiple simultaneous enterprise engagements (managing up to 60 FTEs on major modernization projects like Eurocontrol).
- **AIOps Innovation:** Pioneered the integration of AI-driven automation into customer operating models, defining Centers of Excellence (CoE) for Ansible and OpenShift, reducing manual intervention and lowering MTTR.
- **Application Modernization:** Guided clients through legacy-to-cloud-native transformations (Tanzu to OCP, VMware to OCP-v), establishing robust GitOps pipelines, IAM governance, and multicluster observability frameworks.
- Projects and engagements:
  - Core42 – UAE Public/Private Sovereign Cloud platform – OCP(K8s) & RHOSO 18 (OpenStack), Ansible, IDM,etc… Connected, restricted and Air-gaped env. Azure, AWS & GCP hybridization. Team leading (engineers + developers + Ops, Sec.). Cloud platforms (Dev / Test / Integration / Sandbox / Connected / Restrictedx3 / Private / Private Test). Observability arch. design, Backup, HA&DR, Foundational services arch. definition (+100 developers). GPU integration (nVidia H200). 27 OCP Clusters, 9 OSP Clusters, +2000 compute nodes, + 10Pb Storage.
  - Yorizon: K8s + OpenStack + Ceph deployment. 2 DCs (Munich & Vienna), observability stack and networking arch. design and support on the deployment phase. 5 K8s + 5 OSP clusters.
  - SAP – EIC deployment into OCP. Arch. reference definition. Leading the proposal, and support SAP consulting to deliver PoV to customers.
  - BIS: RH OSP & OCP Hybrid cloud platform. OnPrem – Azure (ARO) – Oracle Cloud -. Ansible Automation Platform – Design and support. Application modernization and transformation. Leading 5 FTE – Observability solution design. (10 FTE Team Lead)
  - Emirates, Deutsche Bank: OSP & OCP Baremetal & AAP PoC – VmWare OCP Poc. Testing OCP-V capabilities vs OCP on top of Vmware Cloud Foundation.
  - Eurocontrol – Application modernization / Transformation. Integration Lead Architect.(Leading a team of 60 FTE). Migration of legacy app to OCP (microservices) and Azure. OCI integration for Oracle DB support. Observability platform integration and validation. DPLT & NDC.
  - Junta de Andalucia, Fod Financiën: Tanzu to OCP4 Migration. Hybridization with AWS. Design and support the migration and the hybridization. (15 FTE team). On-prem hybridization with VCF. DR & Observability arch. design
  - Danske Bank: OCP 4 workload migration from customer's DC to AWS self-managed OCP. Governance model (IAM), Connectivity btw on-prem and AWS design (Direct Connect), architecture design (EC2, S3, RDS, ALB, observability, DRetc.). (5 FTE team)
  - ARAMCO: DevOps Model definition – Ansible & OCP – CNF Maturity Model. Multicluster observability arch design. Applications transformation journey,
  - Deustche Bank: OSP & OCP-v PoV design. Vmware to OCP-v migration. Observability and DR arch. design. HLD & LLD
  - Volvo, Zain, Nutanix, SBSA, SBA, FOD, COVEA, and many other customers. OCP adoption. Hybridization Clouds and on-prem DC.
  - Telco vertical: Orange, Vodafone, etc… RH OSP migration & NFVi migrations. OSP HLD & LLD. Telefonica: Ansible Automation Journey and hybrid multi cluster platform integration (AWS, Azure, GCP). RH OSP & OCP Hybrid cloud platform.

Luis Fernando Ramírez Viejo

Cell: +34 636 644 509 Address: Madrid
e-mail: **luis.ramirez@opencloud.es** Birth date: Febrruary ,21th 1974

- Framework design
  - Preliminary Technical Assessment, Adoption Snapshot, Adoption Profiling, and Discovery Workshop framework design
  - Agile Responses definition
  - Modular approach to deliveries
  - OCP and Ansible CoE definition. Hyperscalers (AWS, Azure, GCP) integration
  - AWS/Azure/GCP Hybrid Architecture

2013-2021 OpenCloud.ES - WW Owner, Lead Architect, CTO IT Services

Operated as an independent Cloud Architect and fractional CTO, delivering scalable infrastructure, driving FinOps, and leading engineering teams for enterprise clients and high-growth tech startups.

- **Engineering Management (QDQ Media - CTO):** Recruited, managed, and mentored a 35-person engineering team spanning DevOps, Backend, QA, and Data. Architected the transition to GCP/GKE, modernizing the CI/CD lifecycle (Jenkins) and overseeing the DWH, CRM, and ERP ecosystems.
- **FinOps & Cost Optimization:** Conducted deep architectural audits for companies like Mango and Prosegur, redesigning their AWS/GCP/Azure footprints to utilize EKS/GKE, Terraform, and Ansible, resulting in significant infrastructure cost reductions and improved performance.
- **Platform Engineering:** Architected and deployed "Zero-Touch Provisioning" OpenStack and Ceph environments for Volkswagen AG (OEM-IL), managing the integration of CI/CD, Istio, and observability stacks (Prometheus/Grafana/ELK).
- **Blockchain & Emerging Tech:** Served as CTO for multiple web3 initiatives (Legendaryum, Lanister Finance), leading small, agile teams (10-25 FTEs) to deliver scalable, secure platforms utilizing Hyperledger and smart contracts.
- Last projects:
  - JTI – VmWare Cloud Foundation Senior Architect – Design and support legacy apps migration.
  - SafariCom, CGM, Vodafone, VISMA, Ziggo, CDMON, Catrain, Universidad de Cuenca, Universidad de Zaragoza, TIM, Gestamp, Wind3, TodoenCloud, INDRA, UCS, Univ. Autonoma Madrid, BIFI, UV, GISS: OpenStack+OpenShift+Ceph sol. Architect. Design & team leading.
  - VICA-DDP: DevOps. Troubleshooting & tuning GKE deployment K8s, NodeJs, Meteor, MongoDB.
  - Sfera: K8s on-premises deployment (OCP3). NodeJs, Mysql, RabbitMQ, MongoDB. Fine Tuning. OCI – Oracle DB.
  - SurfNet: NFVi env. based in OpenStack Train charmed. VPP charm developed & deployed
  - VWG: OEM-IL OpenStack & MlaaS deployment. DevOps & K8s Solutions Architect. OpenStack & AWS (Europe) & Azure (China). K8s, Ansible & Terraform. CI/CD, DevOps. MongoDB, Istio, Fluentd, Jaeger. AWS, Azure.
  - DT: Amazon ECS-EKS solutions Architect. Advisor, design & deployment. Huawei Servers.
  - OpenBChain – Biotech app supported by AI (tensorflow) & a hybrid blockchain network. SuperMicro
  - Carrefour: AWS + Legacy. Design & Deploy: Migration & transformation services to deliver in Amazon. Monitoring environment SLA based. CloudFoundry & OpenShift POC & Cloud Foundry Delivery (ELK., Graphana, Kibana, Zabix, etc..)
  - VolksWagen AG – OpenStack & Ceph – Zero Touch provisioning env. By Mirantis OpenStack support & advisory consultant. Huawei, HP & Fujitsu servers. Observability platform. (ELK, Graphana, Prometheus, Istio)
  - Huawei – R&D – Cloud Solutions Architect for service transformation. Focus on OpenSource customers' DC Migration & transformation services. OpenStack, K8S & Docker env.
  - Metro Madrid: (2014-2015): Supporting RHEL, CentOS and Debian environments. oVirt. GlusterFS, MySQL, Nagios.
  - ONO: Plan, Deploy and Support: OpenStack Public Cloud Based for enterprise customer. Ceph SDS (2014)
  - UNEN: Support and design opensource based services. AWS + S3 migration services. (2014-2015)
  - Jazztel: Business Continuity – Plan, Design & Deployment of BCM for Jazztel for Oracle VM, Linux (RHEL, OEL),HP-UX and Oracle DB environments (2014-2015)
  - Another customer: Policia Nacional + Symantec: Junta de Andalucia, KIO Networks, INE, SoyTic, Netllar, Nextrend, etc...
- Involved in the VW's Private Cloud environment design, and support (Wolfsburg & Mlada Boleslav DC), supervising Mirantis' tasks and involved in task force to solve issues related with CloudFoundry, networking issues & SDS solution performance. (Ceph based) Tasks automation (python, perl, Ansible, etc.).
- Leading these Research topics: Zero touch provisioning environment,SDN definition (design & deployment). Legacy App. Migration to Docker environments. Monitoring tools for cloud env. Defining & designing a solution to provide proactive monitoring using opensource components. MlaaS. OEM-IL MlaaS – K8S & DevOps Architect. Fluentd Integration with OEMIL app, Rolian POC, Ansible & Terraform tech. Lead, Jaeger design & deployment. Legacy applications migration/transformation.

2011-2013 DELL Computer - Madrid NGCS DSE Arch. HW Vendor

- Designed and delivered enterprise architecture solutions focused on Virtualization, HPC, and early Cloud Computing (OpenStack, VMware).
- Led technical go-to-market strategies, driving a €70M/year pipeline and securing a Bronze Award for expanding market share in the Spanish ISP vertical by 4%

2008-2011 SUN/Oracle - EMEA DC Efficiency/DC Virt. Arch. HW & SW Vendor

Acted as the technical lead for international pre-sales and architectural design, focusing on data center consolidation, virtualization (OVM), and MySQL environments across EMEA.

2003-2008 IBM - Madrid IT Specialist IT Services

Large-Scale Team Leadership: Coordinated and led infrastructure pools (Linux, Database, Virtualization) encompassing up to 100 FTEs.
Strategic Execution: Secured a €50M contract through successful OpenSource/Virtualization Proof of Concepts. Managed the complex transition of IT services (50 FTE team) from Spain to Argentina.

(Additional early career experience 1990-2003 as IT Manager at Grupo SMS and Founder at GSSI available upon request).

Birth date: Febrruary ,21th 1974

Technical Proficiencies

- Cloud & Platforms: Kubernetes (OpenShift, EKS, GKE, AKS), OpenStack, AWS, Azure, Google Cloud (GCP), VMware, KVM, OCP-V.
- DevOps & Automation: Terraform, Ansible, GitOps (ArgoCD), CI/CD (Jenkins), Git.
- AI & Next-Gen: OCP-AI, Claude Code, Openclaw, Agentic AI, Model Context Protocol (MCP), Machine Learning / Deep Learning concepts.
- Observability & Storage: Prometheus, Grafana, ELK/Elasticsearch, Jaeger, Istio, Ceph, GlusterFS.
- Languages & Scripting: Python, Golang, Bash/Shell, Perl.

Certification

- **AI/AI Ops**: Anthropic Claude (MCP Advanced Topics, Claude Code 101, AI Fluency Framework & Foundations, Claude Code in Action).
- **Cloud & Architecture**: Azure (AZ-900, AZ-104, AZ-305, AI-900, SC-900), GCP Architect (in progress – 96% success)
- **Legacy Infrastructure**: VMware (VCP, VSP, VTSP), ITIL v.3 Foundation, IBM AIX Certified.
- ITIL v.3 Foundation
- TOGAF
- ISO47001

Education

- 4º Ciencias Geológicas - Facultad de Geología - Universidad de Oviedo
  2º Ingeniería Informática de Sistemas – UNED

Languages

- **Spanish:** Native **English:** C1 **French, Italian, Portuguese:** B1
